Course Coordinator:

Mary Ashley Young
Mary Washington Healthcare
Training Center Coordinator
540-741-2679

Prerequisites

1. You must have a **current** American Heart Association BLS for Healthcare Provider CPR card.
2. You must have working knowledge of cardiac arrhythmias and code drugs.
3. Must be an EMT-I level or above

Schedule

Day 1

0730-0800 Registration

0800-1730 Skill/Learning Sessions

Day 2

0800-1730 Skill/Learning Sessions and Testing

Please notify MHW AHA Training Center prior to class if you will require special accommodations. Every effort will be made to assist students while adhering to AHA guidelines.

Course Goal

The goal of this course is to improve outcomes for adult patients with cardiac arrest and other cardiopulmonary emergencies through provider training.

Objectives

Successful Participants will be able to:

- ❑ Recognize and initiate early management of peri-arrest conditions that may result in cardiac arrest or complicate resuscitation outcome
- ❑ Demonstrate proficiency in providing BLS care, including prioritizing chest compressions and integrating use of an AED
- ❑ Recognize and manage respiratory arrest; cardiac arrest until termination of resuscitation or transfer of care, including immediate post-cardiac arrest care
- ❑ Recognize and initiate early management of acute coronary syndromes (ACS) and stroke, including appropriate disposition
- ❑ Demonstrate effective communication as a member or leader of a resuscitation team and recognize the impact of team dynamics on overall team performance

The American Heart Association strongly promotes knowledge and proficiency in BLS, ACLS, and PALS and has developed instructional materials for this purpose. Use of these materials in an educational course does not represent course sponsorship by the American Heart Association, and any fees charged for such a course do not represent income to the Association.
