

Lung Cancer Research Study

• MT1822-A •

Purpose of this Study

Researchers are trying to collect blood samples to study (analyze) from patients that are diagnosed with lung cancer. Researchers will use the blood samples to try to develop new drugs, treatments or tests, and study how individual differences may affect how drugs work.

Who can participate:

- Patient must be \geq 18 years of age at the time of blood collection.
- Patient must be diagnosed with lung cancer and have active disease.
 - Stages I – IIIa Only
- No history of cancer, except for non-melanoma skin cancer

Requirements:

- Willing to complete a consent and a one time in-person visit with research staff.
- Collection of 4 tablespoons of blood at time of visit. (Blood must be drawn within two weeks prior to surgery OR within 2 weeks prior to the start of neoadjuvant therapy.)
- Collection of Personal Health Information (PHI) including medical history, medications, lifestyle habits and family history.

Compensation:

\$50.00 gift card after successful completion of study visit.

Principal Investigator/Study doctor:

J. Timothy Sherwood, MD
